All the Japanese diplomatic representatives abroad will make similar communications to the governments to which they are accredited.

An the representatives of Latin-America, except those of Mexico, Panama, Cuba, Honduras, Nicaragua and Peru, met at the International Club to-night for an informal talk as to the advisability of joint action in regard to General Horace Porter's proposition for the collection of contractual debts and other points on which joint action is possible.

Angentina would vote for the American propo-n, but with two reservations—first, never to recourse in arbitration unless all the judicial nels in the debtor country are exhausted, and, ad, that force can never be employed, even if Although some persons declared that the meeting was a demonstration against the United States, no speeches and tone of the meeting were entirely

Spiral Inclines at Terminals of McAdoo Tunnel Deplored. To the Editor of The Tribune.

Sir: As a body of business men it should appeal to the new Public Service Commission that the time a insure proper arrangements for handling pas-engers on a city transportation line or on a erminal is when the line is planned or building. ur experience with the Brooklyn Bridge station is ugh to show the futility of expecting to improve fficial supervision and regulation should intervene or the protection of the public is when plans are

According to the plans of both the Manhattan terminals of this line the movement of passengers from the platform to the street level is to be by means of a long spiral incline, with a grade of ten per cent, which will make it steeper than the average hill road. With its various windings this incline will be at least two hundred feet long. Just why this device, which has been abandoned in European stations and in the few places in this country where it was tried, should have been inclined in the terminal plans nobody can tell. Probably the engineers became tired before they reached this point in the plans and left this feature to the office boy.

office boy.

What should be provided in an underground station at this depth (thirty feet) below the street level is some sort of a rapid and reliable mechanical device for carrying passengers to the surface. If, however, the kind of economy all too common in such undertakings is to be applied, in order to save a few hundred dollars in finishing up an enterprise costing millions, if this terminal, like the one on the other side of the city, is to be given over to a daily exhibition of force and indecency, why not install stairs instead of a prehistoric device that was discarded when stairs were invented and that was discarded when stairs were invented and that is used now only in loading cattle on ships and

rains?

For a person who is lame or weak through age steep incline is almost insurmountable, particularly in a crush, while even to the vigorous and oung it is tedious and slow, bringing into use uncountered muscles and requiring four or five times. DAILY TRAVEL

WANTS LOAFER EVIL SUPPRESSED. To the Editor of The Tribune. Sir: Flease thunder against the "loafer evil," chich is getting extremely dangerous, vicious and innoving in the various boroughs, especially in danhattan. Visitors from other states are aston-

shed at the lack of suppression of the evil and the ion-punishment of offenders.

MORRIS M. VAN ALLEN. New York, July 24.

"FICKLE FOLLY'S FLOWER." To the Editor of The Tribune.

To the Editor of The Tribune.

Sir. The periodical patter about the columbins as the "national flower" of this country-supposing for a moment that we really need such a thing—should be sufficiently disposed of by reference to the dictionary. Under the title of "Symbolic Flowers" is found the significance or symbolism of the columbine as "Folly, desertion, inconstancy." From time immemorial those qualities have been associated with that flower. Truly, a five emblem for this nation!

FERGUSON EXPLAINS CANAL DELAY. Contractor Says It Is Due to the Frequent Changes in Plans.

Francis M. Ferguson, president of the Ferguson Contracting Company, returned to this city yesterday after a conference at Albany with Superintendent Stevens and members of the canal board. Mr. Ferguson said that he thought that the extension of eighteen months granted to him yesterday would be sufficient to allow him to complete the work on Centract 2, at Waterford, connecting the work on Contract 2 at Waterford, connecting the canal and the Hudson River.

Mr. Ferguson said that the delay in the work was caused by frequent changes in plans, particularly in the width and depth plans, by Chief Engineer Van Alstyne.
